

IntraLock™ Jointing Technology

Improved Jointing Technology Replaces Antiquated “DoveTail” Designs for Sectioned Gaskets

- **Tight, “Jigsaw” puzzle fit**
 - Torturous leak path
 - Enhanced sealability/reliability
 - Mechanically rigid joint
 - Sections “snap” together and stay together
 - No glues or “paste” required to seal joint
 - Easier, quicker assembly

Conventional DoveTail Joint

Leakpaths

IntraLock™ Joint

IntraLock™ jointing technology utilizes close tolerance, CAD operated Atom Flash Cut fabrication equipment. **IntraLock™** designs are custom designed based upon the cross section, thickness, and geometry for all common sheet gasket materials.

Specify VSP **IntraLock™** sectioned joints for all of your large diameter gaskets
